

# STRUCTURAL PRUNING

Now is a great time to prune back many of your deciduous trees. Structural pruning allows for healthy growth and proper structure. Call in our team to ensure your trees are cleanly pruned so they can last a lifetime. We also offer these other winter services:

## Shrub Wrapping

It is important to wrap deciduous shrubs and evergreens for many reasons including: snow damage, needle discoloration, animal damage, and sun scald. The cold temperatures and snowy conditions can hide many of these tragedies until the spring. Make sure you are one steps ahead so that you are ready to go for the next growing season!

## Deer Repellent

Those who are in heavily wooded areas understand the fight between deer and their taste for delicious shrubs. When food becomes scarce and temperatures are dropping, deer will do anything to eat. Fences work great, but what do you do if you do not have one? Thankfully, there is a specific ingredient that can keep those deer away: thiram. Let us help you keep those deer out of your yard this year!

## Brush Clearing

Brush cleaning can be a hassle, but is rewarding. Many people here in New England have wonderful views of rock walls, barns, streams, or rock walls that are being veiled by weeds or trees. Aside from opening these areas for aesthetic reasons, brush clearing can also provide a safer yard. Allowing for a better line of sight can prevent unwanted visitors on site. Our crews are happy to help with any brush clearing!
